aLOKSAK® OPSAK™ SPLASHSAK™

LOKSAK, Inc. of Park City, Utah is the inventor and manufacturer of the aLOKSAK and OPSAK storage bags and SPLASHSAK carrying cases. Our products are the only re-sealable and completely water-proof, dust-proof and humidity-proof storage bags on the consumer market.

We have exercised control over every aspect of product development, marketing and distribution since 1998. We are an efficient and responsive company with unsurpassed products and an unwavering commitment to customer service.

As an avid SCUBA diver, the founder of LOKSAK brainstormed for years to make a 100% waterproof bag. The aLOKSAK is the outcome of months of dedication and research.

Our products were originally designed to keep contents safe from water, but it quickly became evident that the bag was capable of much more. aLOKSAK soon earned the moniker of "the element-proof storage bag"--adding dust, humidity and air to its list of neutralized factors.

In 2006, as product development revealed the possibility of making our storage bags impenetrable to odors as well, we launched a new product--OPSAK durable bags. These odor-proof bags are perfect for keeping refrigerators free of strong odors, and for keeping wildlife away from food and campsites.

LOKSAK Today:

LOKSAK sells products in markets as diverse as the applications of our products. We sell internationally into most outdoor and civilian markets as well as into all branches of the military, government and law enforcement worldwide.

Many Original Equipment Manufacturer (OEM) companies integrate aLOKSAK and OPSAK barrier bags into their own product lines.

As technology advances, LOKSAK will continue to set industry standards for lightweight, high-performance, affordable storage solutions.

When it comes to superior storage, we're ready to meet the next great challenge. Yours.

aLOKSAK[®]

Tested and Approved by U.S. Navy Experimental Diving Unit and SSI.

Electronics, firearms and documents are damaged from exposure to the environment. aLOKSAK is the only re-sealable, flexible container offering protection from all the elements. The patented, light-weight storage system prevents air, humidity, water, dust and sand from harming your valuables. aLOKSAK can also ensure your treasures are safe from the passage of time.

Features:

- Hermetic Seal, an absolute airtight seal preventing the re-entry of air and micro-organisms
- Made in the USA
- Holds 5 patents
- Stock sizes ranging from 5" x 4" to 32" x 16"
- Protects against microscopic particles like dust and sand
- Recyclable and reusable

Technical Specs:

- FDA and NSA Approved Medical Grade Materials for food and biohazard storage
- Comprised of .6 mil new generation film
- Dart Impact greater than 850 grams
- Tinsel Strength rated to 6,250 PSI
- Scuba Schools International approved waterproof up to 200 feet
- Durable 6 mil film has a "cold-crack" tolerance to -50 F/-45 C, far lower than that of PVC or vinyl
- No BPA, based on information from our raw materials suppliers and made in good faith

Field Tested

"I've used aLOKSAK since 1999 in every race and in every kind of diverse condition. Every piece of clothing, mandatory gear, electronics, and even food we carry during a race go into an aLOKSAK. aLOKSAK has never failed me."

—Ian Anderson, World Class Adventure Racer

ODOR PROOF

www.loksak.com

OPSAKTM

ODOR PROOF: Tested and Proven by the North American Fishing Club

Going camping? Well, you will sleep peacefully tonight knowing your food is stored in “bear-proof”, state of the art storage bags. OPSAK is the leading edge product in its class—Why?—it allows you to enjoy your camping rather than worry about attracting bears that would normally smell the odors from traditional storage containers. OPSAK bags are re-sealable and proven odor-proof. Regardless if you are camping, traveling with a baby or adventure racing, these light-weight containers will make for a safer and more pleasurable journey.

Features:

- Hermetic Seal, an absolute airtight seal preventing the re-entry of air and micro-organisms
- Made in the USA
- Traps all odors inside the re-sealable lightweight bag
- Stock sizes ranging from 9” x 10” to 28” x 20”
- Protects against microscopic particles like dust or sand
- Recyclable and reusable

Technical Specs:

- FDA Approved Medical Grade Materials for food and biohazard storage
- Dart Impact greater than 850 grams
- Tinsel Strength rated to 3,720 PSI
- Can withstand direct heat up to 165 Fahrenheit
- You can add boiling water to the OPSAK to cook food
- Patented, protected Closure and odor-proofing Film Technology and materials
- No BPA, based on information from our raw materials suppliers and made in good faith
- Scuba Schools International approved waterproof up to 200 feet

Field Tested

“These re-sealable plastics bags seal in odors so food and toiletries won’t attract animals. I used this for my husband’s favorite stinky Danish Cheese. I couldn’t detect any odor at all.”

SPLASHSAKTM

Ian Adamson

SPLASHSAK and aLOKSAK are the ONLY choice of World Champion Eco-Challenge Adventure Racers Ian Adamson, Mike Tobin, Mike Kloser, Robyn Benincasa, Aaron Prince, Travis Macy and many more...

"I've used aLOKSAK since 1999 in every race and in every kind of diverse condition. Every piece of clothing, mandatory gear, electronics, and even food we carry during a race go into an aLOKSAK. aLOKSAK has never failed me."

—Ian Anderson, World Class Adventure Racer

"You just can't trust plastic bags 'out there,' when dry clothes, dry food, and dry batteries can truly make the difference in your survival. You can trust the aLOKSAK, and we have for the last 10 years, in every Eco-Challenge, Raid Gauloises, Primal Quest and Southern Traverse."

—Robyn Benincasa

The SPLASHSAK offers a variety of accessories to a pair of aLOKSAK storage bags. We offer an array of sizes designed to accommodate everything from maps, PDA's, passports and more. Regardless if you would like to discreetly protect your passport and cash, or protect a cell phone on a boating trip, the SPLASHSAK is the ideal accessory for everyday life.

Features:

- Made in the USA
- Comes with two aLOKSAKS
- Various carrying options including neck strap, armband, waist strap, safety hooks and belt loops
- A variety of sizes for everything from PDA's to maps
- Durable construction

Technical Specs:

- 420 Denier Nylon used in most of our products
- 1000 Denier Nylon used in our military products

Field Tested

"The SPLASHSAK I use comes in two sizes; one for personal items such as identification and money, and another for charts and maps. The pockets are easy to seal and are protected in a nylon shell. I recommend these to all North American Fishing Club members."

PRESS REVIEWS and TESTIMONIALS

"To Whom It May Concern:

We confirm herewith to have tested the waterproof containers "aLOKSAK" in our pressure chamber under constant pressure of 200 SFW or over 60 meters of actual water depth from Friday, May 19th 1900 hrs to Friday, June 2nd, 1900 hrs for leaks. We have found that the bags have withstood the constant pressure and that we found no leaks. We therefore certify that "aLOKSAK" is a container waterproof to depths exceeding 60 meters."

—**SCUBA SCHOOLS INTERNATIONAL**
*formerly National Association of
Scuba Diving Schools.*

*NASDS Japan Kabushikikarsha
Executive Director Andreas C. Vogt*

aLOKSAK stress tests by Navy Experimental Diving Unit

Testing was conducted in NEDU's test pool, in water heated to 94F (34.4C). The bags were filled with both rigid and compressible items, to the point where the bags bulged out, therefore putting moderate tension against the seal. Four tests were performed on small and large bags, as outlined below:

Submergence—bags were submerged to a depth of four feet.

Trash test—Bags were held under water with one or both hands in a variety of positions, primarily on the bottom of the bag so that the seal wasn't inadvertently held closed, and so that the items inside, driven by centrifugal force, could carom against the bag seal, maximizing the likelihood of rupturing the seal.

Pull test—Bags were gripped on lateral sides just below seal and various amounts of force were applied to try and break seal.

Squeeze test—palms were placed on lateral side and bag was compressed (seal side up) at points low, in the middle, and on top of the bag.

Results did not vary between the two bag sizes, and are as follows:

Submergence test: Passed, despite excessively rough handling.

Trash Test: Passed

Pull Test: Failed, but only after repeated maximal efforts.

Squeeze Test:

Lower: Passed

Middle: Passed

Upper: Failed when strong effort was applied on an air bubble just below seal.

North American Fishing Club Seal of Approval

It took 35 men to test and approve our products in order to earn the NAFC seal of approval.

The SPLASHSAK I use comes in two sizes; One for personal items such as identification and money, and another for charts and maps. Each contain two aLOKSAKs. The aLOKSAK bags are easy to seal and are protected in a nylon shell (SPLASHSAK). I recommend these to all North American Fishing Club members."

—**Goy Barton, Anchorage, AK**

□ National Geographic Adventure Magazine has hailed our products three times over the course of the last five years. The first mention went to our Map Case. National Geographic listed the Adventure Racing 101 items necessary for a race and referred to "a waterproof map bag...ideally the SPLASHSAK Map Case." In the 2005 equipment issue of National Geographic Adventure Magazine, aLOKSAK was among the items voted "The Very Best of the Very Best New Gear."

In 2009 The editor of National Geographic did a review on our bags used with the iPhone and other touch screen electronics and voted our aLOKSAK "The World's Best Outdoor iPhone Accessory"
www.theadventurelife.org/2009/02/gear-review-worlds-best-outdoor-iphone-accessory

Gear Review: World's Best Outdoor iPhone Accessory.

"The most essential iPhone accessory isn't a silicone case, extra battery, or Bluetooth headset. It's not even a votive candle with a picture of Steve Jobs on it. This "necessary" costs just six bucks for a three-pack and it is...a hyperstrong, waterproof, ziplock uber-baggie called aLOKSAK." Don't snicker, I'm serious. Nothing will protect your precious hunk of gizmolove better than the aLOKSAK—made of recycled polyethylene and treated with medical-grade protective film, it's the cheapest, lightest, strongest iPhone insurance you can buy."

—Steve Casimiro—West Coast Editor, National Geographic Adventure Magazine

"Highly waterproof. Despite trying to get the bags to leak under pressure, overstuffing, abusing and even power washing with a hose and power washer fitting, the bags would not leak and all contents stayed dry. I even threw a bag fully loaded into my washing machine and no leaks."

—Michael Hodgson, Editor *SNEWS Magazine*

"Water and debris can't penetrate this armor."

—*Boating Magazine*

"My number one choice for keeping all of my important gear dry in the worst conditions".

—Ian Adamson, 3-time *Eco Challenge* winner

"One of the best discoveries I have made in the last year are the aLOKSAK bags. Now, simply put, if I don't have my gear in an aLOKSAK, I don't go."

—Billy Trolan, MD

Medical Consultant: Naval Special Warfare, Air Force Pararescue, Federal Bureau of Investigation.

"I can't say enough about how much we love these bags. The addition of the aLOKSAK in our Ultra Light Series has made them our hottest selling kits. We sell them very successfully into every market and industry."

—Frank Meyer, Co-Founder *Adventure Medical Kits*

"Wild Things! These utility bags are liquid and air-tight, element proof re-useable storage bags that protect food, cameras, GPS, units, cell phones, documents, clothing, film, or almost anything else."

—*Running Times*

"It started all with my cell phone. After the battery finally died and I replaced the phone with a newer, tinier phone, I found out that cell phones can be destroyed by water. That's why I was so interested in the new air/liquid tight bag from LOKSAK. I can depend on other bags to leak, while the aLOKSAK is guaranteed water-tight down to 200 feet."

—*Back Country Magazine*

"Enter the LOKSAK waterproof Map Case that allows you to stuff, tarnish, or dunk your map in the worst conditions without rendering it useless."

—*Paddler Magazine*

"Ever zip your valuable into a refrigerator bag before going abroad? Wouldn't it be helpful if it actually kept water out? The aLOKSAK does! A companion product, the OPSAK, is odor proof as well, so campers can store their strong-smelling food, soiled diapers or toiletries they want the bear to ignore."

—*Chesapeake Bay Magazine*

"A big step up from your everyday Ziploc, aLOKSAK storage bags from LOKSAK are a stronger film with a re-closable hermetic seal that is tested and approved by the Navy Experimental Diving Unit."

—*Sail Magazine*

"The leakproof bag aLOKSAK, offers unparalleled water-tightness in a recloseable, cost effective bag. While it is the best dry bag of its kind in the world, it also offers air-tight protection of metal, food storage and electronic equipment at sea level."

MARKETS **and** APPLICATIONS

Field Tested

"I found out that cell phones can be destroyed by water. Mine wasn't, but I began contemplating the situations where a good rainstorm or dunking could put mine out of commission.

That's why I was so interested in the new air tight/liquid tight bag from aLOKSAK. I can depend on other bags to leak, while the aLOKSAK is guaranteed water-tight down to 200 feet below the surface. The U.S. Navy and the National Association of Scuba Diving Schools have tried the bags and both concluded they are really water-tight. That should keep my pancake mix dry!

These bags are available in a range of sizes from 5" x 4" up to 32" x 16". The 12" x 12" works well for maps."

—David Harrower, Backcountry Magazine

The many uses of the aLOKSAK, OPSAK, and SPLASHSAK are uniquely positioned to meet the needs of a variety of industries including medical, defense, outdoor retail, and product enhancement. Bottom line, whatever you put in an aLOKSAK or OPSAK will come out in the same condition.

Some Current Clients:

- The U.S. military uses our products to shield weapons and electronics from water, sand, salt and air
- The FBI uses our products for the storage and transportation of hazardous materials
- Various law enforcement departments utilize our bags for evidence storage
- Genentech, an industry leading biotechnical company, employs the aLOKSAK for items that need to be waterproof and liquid tight
- Magellan provides their customers with the SPLASHSAK for their passports, airline tickets and other valuables
- Adventure Medical Kits uses the aLOKSAK to create lightweight and element proof first aid kits
- EMS and REI sell our products to outdoor enthusiasts
- Outdoor enthusiasts around the world rely on the aLOKSAK and OPSAK for stellar performance

CUSTOM and OEM OPTIONS

CUSTOM and OEM OPTIONS

Utilizing cutting edge materials, seals, one-way valves and films, LOKSAK works with its clients to create the ideal solution for their needs. To any product we can include your company's brand or advertisement. Adventure Medical Kits incorporated an aLOKSAK into their Ultra Light Series Medical Kit. Skiing Magazine later included it on their 50 Perfect Gifts holiday buying guide. The marketing opportunities are endless.

Possibilities:

- Add a second seal
- Add grommets
- Opaque film
- One-way valve
- Custom sizes
- Custom colors
- Custom waterproof labels
- Custom text
